HEX COLOUR: #F4364C
RGB: (244,54,76)
CYMK: (0,86,66,0)

MODUL

Where precision meets modernity

MODUL is a concept identity for an architecture studio focused on residential and commercial design. Its house-shaped logo turns the studio's work into a simple, recognisable symbol. Inspired by **Bauhaus** and **Piet Mondrian**, the visual system uses clean geometry and a bold red, yellow and blue palette. The identity extends across posters, stationery and logo animation, bringing the same structured, contemporary look to each application.

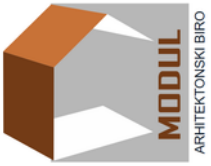

Finding the MODUL mark

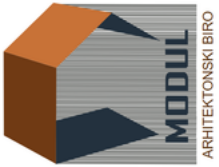

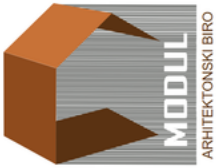

Before settling on the MODUL identity shown on the previous page, I explored several different logo ideas. These early concepts tested different ways to represent the architecture studio. Comparing them helped me decide which direction best suited the brand and develop the final logo.

These logo variations explored a more dimensional, modular symbol and different colour combinations.

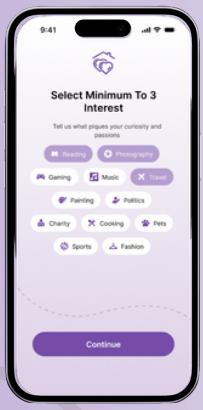

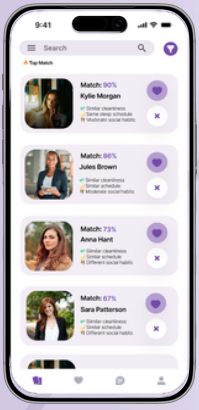

Desing of TrueMates

DESIGNING TRUEMATES

by Ana Nikolić
App concept and UI

TrueMates is a mobile app concept that helps people find potential roommates who fit their lifestyle. I designed the experience to guide users from choosing their preferences to browsing profiles. The onboarding screen introduces the app, while the profile cards make it easy to compare potential matches. A soft purple palette and friendly interface help make the experience feel welcoming.

Faculty Game

DESIGN

ON THE LINK, YOU CAN EXPLORE THE FULL GAME DEMO TO SEE ALL THE DESIGN ELEMENTS IN ACTION:
HTTPS://DRIVE.GOOGLE.COM/FILE/D/1KGPM9IWA1VODD_RL2VJAOXALEZSZRPB-/VIEW

MY FRIEND AND I CREATED A FULLY FUNCTIONAL 2D ADVENTURE GAME TO HELP INCOMING STUDENTS GET TO KNOW THE FACULTY OF FAMNIT AND UNDERSTAND ITS PROCEDURES. WE DESIGNED THE GAME'S VISUAL STYLE AND CREATED CUSTOM ELEMENTS INSPIRED BY THE FACULTY, COMBINING THEM WITH SELECTED ONLINE ASSETS. TOGETHER, WE BROUGHT THESE ELEMENTS INTO AN INTERACTIVE GAME THAT MAKES USEFUL INFORMATION MORE ENGAGING TO EXPLORE.

A SMALL SELECTION OF THE MANY GAME ELEMENTS WHICH WERE DESIGNED PIXEL BY PIXEL.

BACKGROUNDS AND VISUAL ELEMENTS FOR EVERY SCENE WERE DESIGNED IN ORDER TO REFLECT THE FACULTY AND BRING THE GAME WORLD TO LIFE.
